INTRODUCTION

This is the sixth annual edition of Population Reports produced by the Regional Planning Division, Planning and Development Department. Similar editions were produced reporting City of Hamilton population since 1971. Reports are generated by computer using an information system operating with assessment files. Only a limited number of reports are printed and these are retained in the Planning Department where they are available for public use.

The information base for the statistical summaries is taken from standard assessment files provided to municipalities for taxation purposes. The census data on the file is enumerated in the month of September and reported by the assessor in October each year. However, the extent of detail reported is not sufficient to satisfy all municipal requirements. This publication provides the user much more scope when examining specific age and sex groups by geographic location. Standard reporting areas from planning units blanket the region providing a 4-tiered level of reporting: regional, municipal, planning division, and neighbourhood. Neighbourhood levels are reported for Hamilton, Dundas and Stoney Creek. For ease of reference, the four levels are sorted into three sections of this publication. Reports of the regional and municipal tiers are contained in Section 1; planning divisions in Section 2; and neighbourhoods in Section 3. Maps illustrating the location of planning units precede each section.

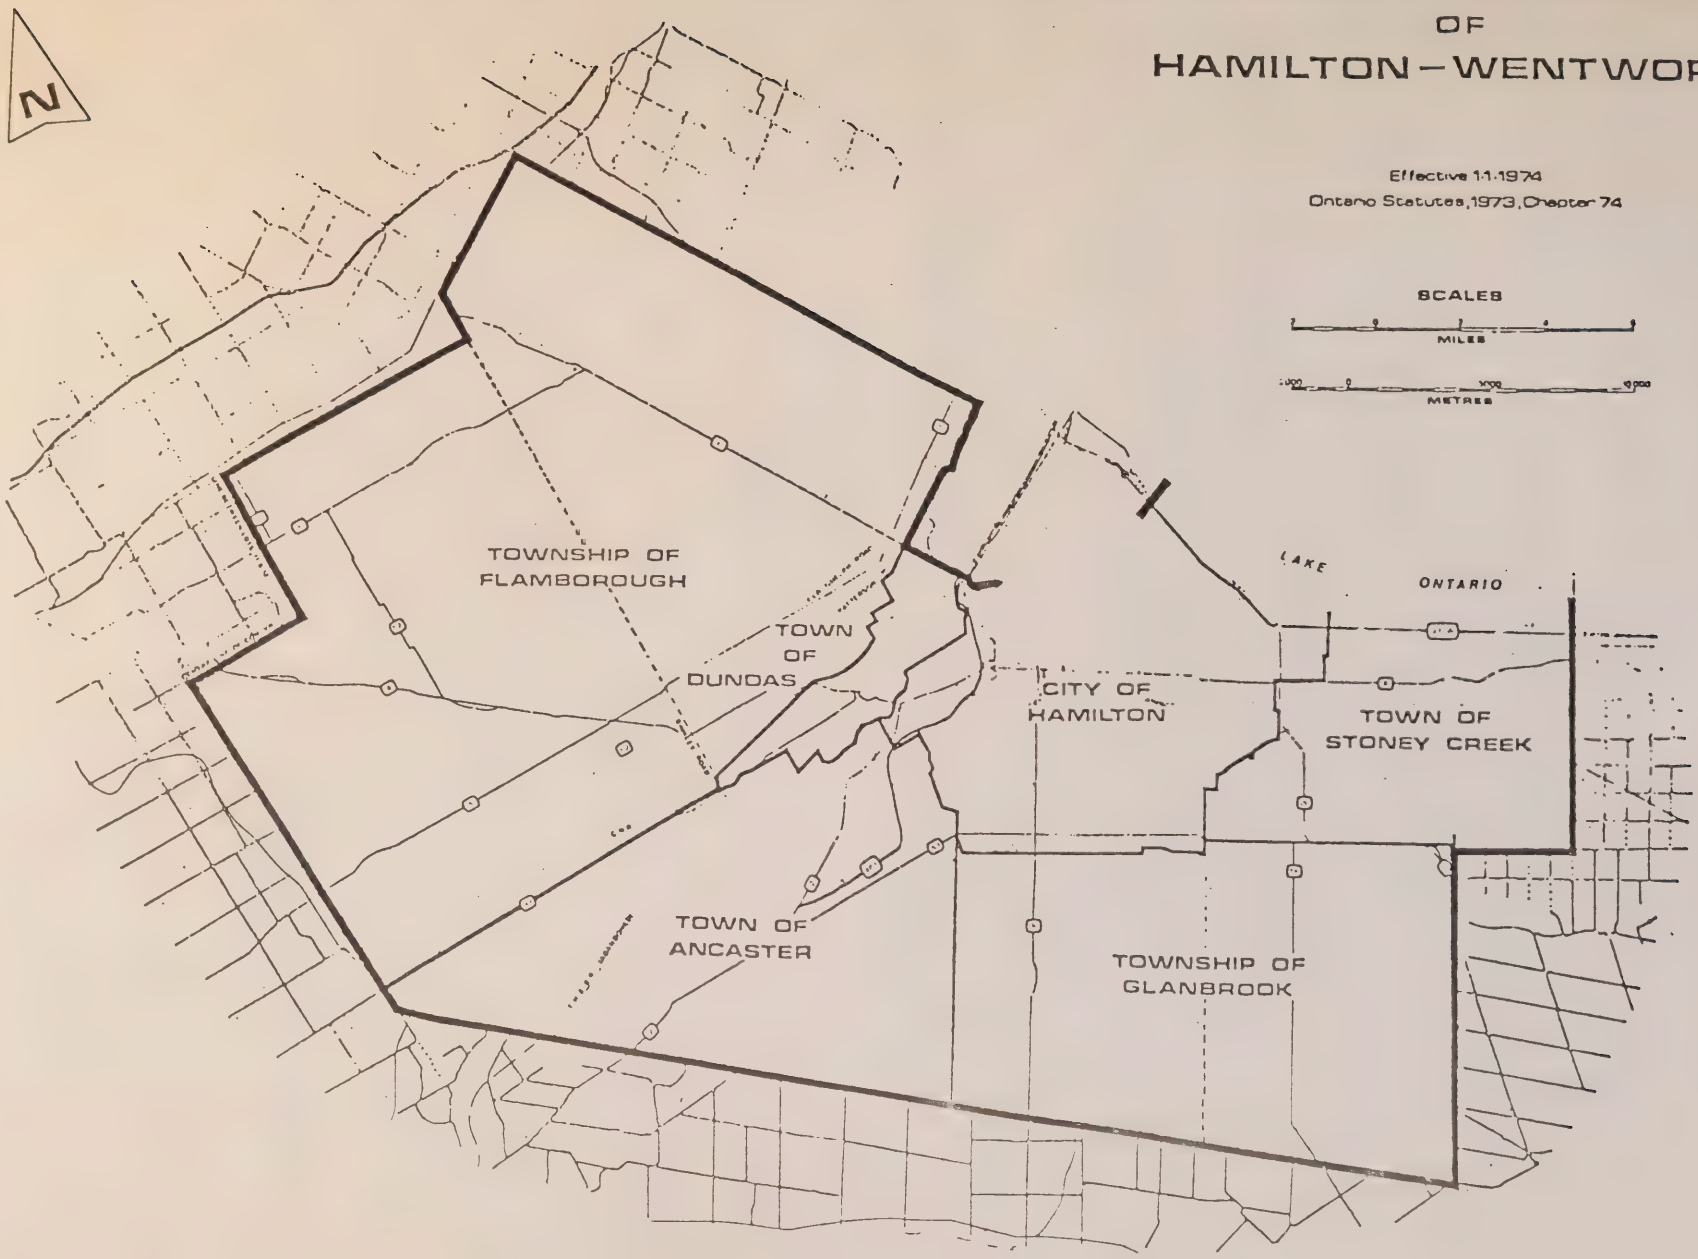

CAUTION: Users should take note that minor discrepancies will be observed when comparing these reports with those released by the Ministry of Revenue. This problem is unavoidable. It occurs because the data base which produces these reports varies in time by three months from the file that is used by the Ministry. The official census population is produced by the Ministry. The following table illustrates the difference between the two reporting systems, by municipality, in 1979.
